Technical Skills

Languages & Frameworks: JavaScript, Node.js, Express.js, React.js, Next.js, Redux.js, Typescript, GraphQL, HTML

Databases: MongoDB, MySQL, DynamoDB

Cloud Services: AWS Services

Other Skills: Git, Testing with Mocha and Chai

Experience

Depthin Solution

November 2022 – Present

Full Stack Developer

Surat, Gujarat

Logistics Platform

- **Spearheaded** and maintained a logistics platform for managing shippers and carriers, determining rates and carrier selection based on postal codes and package details.
- **Architected an interactive** dashboard with **date range filters**, **drill-down features**, and scrollable shipment lists, handling both frontend (React.js) and backend (Node.js, DynamoDB).
- **Implemented** shipment management features, including **item sections**, filters, **90-day report export**, and shipment history filtering using **AWS AppSync** and **GraphQL**.
- **Engineered** backend solutions such as **webhooks** for real-time customer tracking updates, automated tasks for fuel surcharge adjustments, and **command-line interfaces** (CLI) for data handling.
- **Generated** PDF and ZPL labels for shipments and tracked company/warehouse updates through a **history feature**.
- **Enhanced** code reliability with comprehensive unit tests using **Mocha Chai framework** and reducing bug.

B2B Gamified Community Platform

- Developed and maintained a **gamified challenge platform** (Challenge → Action → Reward) with analytics dashboard, reward redemption shop, and **AI-driven configuration** support.
- Built advanced admin CMS features including **multi-step forms**, **validation workflows**, campaign management, reward pairing, and multi-language support.
- Integrated **analytics APIs** and optimized **MongoDB** queries for **participant tracking**, engagement metrics, and performance scalability.
- Contributed to **CI fixes**, **PR reviews**, and AI-based UI customization and automated reward-shop integration.
- Extended **AI-powered automation** to dynamically configure challenges, rewards, and UI themes, bridging manual CMS controls.

Real-estate VR Platform

Jan 2024 – Dec 2024

- Contributed to a **VR platform for real estate**, enabling users to create and experience virtual property tours.
- Designed features such as **scenes upload**, **floor plan management**, and **center logo functionality**, with full support for **file operations** (upload, delete, rename, sort).
- Crafted an intuitive UI with **Tailwind CSS** to improve user experience across various application areas.
- Integrated the **Cashfree payment gateway** to enable secure online payments for platform services, handling payment initiation, verification, and success/failure flows.

Personal Project

MERN Stack Job Portal

April 2024 – June 2024

- **Engineered** a full stack job portal using **MongoDB** as the primary database, leveraging **Mongoose** for schema modeling and efficient data retrieval.
- **Established** separate **Admin** and **User** Panels for job postings, company registrations, and job applications, ensuring structured data storage and retrieval.
- Added features for efficient **job searches**, implemented **filtering**, and enabled application **tracking**, enhancing the user experience.

Education

Uka Tarsadia University

June 2018 – May 2022

Bachelor of Technology in Computer Science

Surat, Gujarat

Grade: 8.4 CGPA
